VENDOR MANAGED INVENTORY

Our value added services offer cost savings that apply directly to your assembly line and maintenance process. Each Hyspeco VMI Specialist offers on-site industry experience, customer service, and a knowledgeable presence that aids in solving costly problems and is proven to reduce manufacturing expenses.

We provide you with a fluid power relationship that caters to your every need, managing and supplying inventory in a way that supports the foundation of your company.

BIN STOCKING PROGRAM

Our Vendor Managed Inventory drivers are scheduled based on the customer's chronological needs. Deliveries can be scheduled monthly, bi-weekly, weekly or sooner depending on your immediate requirements. Representatives arrive outfitted to fill your stock demands, double check inventory counts, provide input on manufacturing efficiencies and updates on the other services Hyspeco offers. Dedicated to out deliver the competition, we go above and beyond to make sure you are taken care of every time.

HYSPECO 5-S STANDARDS

- Sell the product
- Source the product
- Stock the product
- Service the product
- Stand behind the product

Your Fluid Power Everything

www.Hyspeco.com

COST SAVINGS EXAMPLES:

- Fewer overhead man hours to maintain stock
- Fewer purchase orders created (i.e. blanket PO's, fewer vendors)
- Less in-house stock
- Smaller footprint due to reduction of inventory
- Shortened overall/average downtime due to fewer stock outs
- Efficiency increases due to process mapping of point of use stock
